

HIGH LEVEL *Enterprises*

If you're searching for a transportation solution that stands out from the mundane sea of mass-produced buses – your search ends with High Level Enterprises. The meticulously selected team crafts top shelf buses, elevating your investment to unparalleled heights. With High Level Enterprises, your fleet becomes more than just a mode of transport; it becomes a rolling billboard that speaks volumes for years to come.

MAVRYK Highlights

1.5 X 1.5 Steel Cage Construction *Delivers exceptional strength and durability, providing a robust, rigid foundation that significantly extends the lifespan of your vehicle*

Fully Powder Coated Body Structure *The smooth and durable finish stands out as a key feature, specifically chosen to ensure long-term, low-maintenance results*

Pressure Laminated One Piece Sidewalls *Our pressure-laminated sidewalls are bonded directly to the steel structure, a meticulous process that results in unmatched strength. This design not only eliminates the risk of beltline corrosion but also ensures a more uniform window seal, making maintenance simpler and more efficient*

Hot Melt Laminated Azdel to Filon Exterior Panels *This process takes TIME – but the benefits of the resulting product will demonstrate a surprising strength and rigidity, and a long-term corrosion-free presentation for your customer's "Billboard"*

1.5 Inch Solid Foam Wall Insulation *Our sidewalls offer 50% thicker insulation compared to industry standards. This added thickness provides superior soundproofing and better temperature control, making it a "while-in-motion" standout feature*

One Piece Impact Guard Roof *Our fiberglass-reinforced polypropylene roof, enhanced with UV protectant, is tougher than nails. If you despise leaks as much as we do, you will appreciate this innovative feature. Another low-maintenance ownership experience for the long term*

Roof Radius Reinforced with Filon *While it may look the same from the outside, the real difference lies beneath the surface. Our reinforced roof radius, bonded to Filon, provides superior protection against low-impact damage, a common issue with fabric corners*

Lift Door Framing Below Curvature of Roof *By keeping the roof intact without cutting or adding caulk-prone areas, we maintain its full strength and eliminate a common source of future leaks*

Strong-Back Reinforced Crossmembers *This approach enhances strength, resilience, and lifespan, preventing costly remedial issues down the line. By addressing it now, we avoid expensive repairs later, ensuring a more reliable and long-lasting "solution before the problem"*

PerformMAX® 500 Panel with Ovation™ Overlay Sub-Floor *Built tough with a solid undercoat, this flooring is engineered for durability. Backed by a 7-year warranty, it's a reliable choice that delivers lasting performance you can trust*

Fully Welded Skirt Structure *Unlike traditional bolt-on or riveted designs, our welded construction provides superior structural integrity, eliminating potential weak points and ensuring a seamless, long-lasting performance*

Steel Powder Coated Entrance Door Portal *This top-tier rust prevention process offers exceptional adhesion to sidewalls, surpassing industry-standard surface treatments in durability and performance*

MAVRYK Highlights

One Piece Composite Front and Rear Caps

Our design eliminates seams and joints, reducing the risk of leaks while providing improved structural resistance to impacts and minor collisions, all with a sleek, modern finish

Aluminum Fender Flares *Compared to the industry-standard rubber or plastic, our fender flares have the superior resiliency to withstand harsh environments and collisions without cracking or corroding*

Fixed Glass Solid Windows *If T-sliders are your preference, we can do that, however our solid windows offer superior weather sealing, enhanced safety, and reduced maintenance, all with a sleek design and better thermal insulation*

In-House Harness Shop *By crafting our own harnesses, we offer unlimited customization to meet the specific needs of your business, fleet, or unique one-off configurations*

Amphenol and Molex Harness Connectors *Engineered for durability and precision, these industry-leading connectors ensure superior resistance to vibration, corrosion, and wear, minimizing the risk of faults and maximizing performance*

Full Interior and Exterior LED Lighting *With up to 90% energy savings, a longer lifespan, reduced maintenance, and enhanced safety with instant illumination and lower heat output, LED has quickly become the expected experience*

Streetside Corner Exhaust Exit *Your passengers will never have to deal with the smoke and smell of exhaust fumes while loading or unloading*

Bi-Fold Electric Entrance Door *Pick up passengers with a push of a button, enhancing convenience and safety while streamlining passenger flow and reducing maintenance*

Two-Step Entrance *Our LED illuminated entry steps come just under 10 inches tall, ensuring ease and convenience for any type of passenger*

Grey FRP Anti-Microbial Interior *Highly resistant to impacts, scratches, and dents, FRP ensures a long-lasting interior that can withstand heavy use and rough handling while maintaining an easy to clean, corrosion free surface*

Cove Molded Altro Flooring *Engineered to endure heavy foot traffic, this slip-resistant flooring ensures a safe and stylish ride for passengers. Our coved design simplifies cleaning and helps prevent leaks from reaching the subfloor*

Back-Up Alarm and Camera *Providing enhanced safety and maneuverability, these features prevent accidents, boost driver confidence, and provide peace of mind for both operators and passengers*

Full Service Graphics Department *Enhance your brand visibility with a professional design, and enjoy cost-effective advertising all tailored to your unique identity and expertly applied by our in-house graphics team*
